Hi Jayne,
I did hear the good news earlier, but not the bad news :(

I think we can share with EPA and NOAA the guidance document, but we had some more internal review and had some good suggestions from our stormwater staff on how to make the document more useful for DMAs. We have not yet made those revisions, but when we send you the document we will identify what additional revisions we have planned. We can discuss this afternoon.

cheers
Gene

Thanks for sharing this part of the schedule.

What is the status of the draft guidance document for implementation plan development in urban and rural residential areas? Is that ready for external review yet? I guess you can answer this one on the conference call...

Did you hear the good and bad news? The good news is that our HQ office gave us an extra 100K for the Oregon LiDAR project. The bad news is the estimate came out much higher than we expected. We estimated 290K and the lowest bid came to over 430K.

Cheers,

Jayne
